SKILLS

Programming Languages: TypeScript, JavaScript, Java, Python, C/C++

Frontend: React.js, Redux Toolkit, MUI, MobX, HTML, CSS

Backend: Node.js, Express, Spring Boot, RESTful APIs, OIDC/JWT, OAuth2.0

Databases: Microsoft SQL Server, MySQL, PostgreSQL, MongoDB, Redis

Cloud & AI: Microsoft Azure, Azure AI Foundry, Azure OCR, AWS (ECS, EC2), Docker, CI/CD

Development Tools: Git, Azure DevOps, Browserless.io/BrowserQL, Puppeteer, Jest, JUnit, Linux

EXPERIENCE

LawyerDoneDeal Corp.

11/2025 - Now

Full Stack Software Developer

Toronto, Ontario, Canada

- Engineered **RenAI**, an AI-powered document ingestion pipeline combining **Azure OCR**, rule-based extraction, and **vision LLMs** to extract structured data from legal documents and automatically populate RealtiWeb matters, reducing manual data entry by an estimated **75% across 5,000+ monthly requests**.
- Independently built a greenfield **Family Law** application end-to-end using **React, TypeScript, Node.js, and SQL Server**, implementing **OIDC/JWT authentication**, reusable auto-saving forms, matter notes, and JSON-driven legal document generation to support **hundreds of submissions monthly**.
- Modernized **RealtiWeb**, LDD's flagship conveyancing platform with approximately **60% Canadian market share** and **10,000+ lawyers**, by building an **Alberta ARLO land-registry importer** that normalized multiple new title formats into the legacy SPIN2 data model with automated regression testing.
- Maintained and extended **BrowserApi**, an **Express/TypeScript** browser-automation service integrating RealtiWeb with external systems lacking reliable APIs, using **Browserless.io/BrowserQL**, Puppeteer, and proxy/session management to overcome **Cloudflare anti-bot challenges** and support Law Society, realtor, land-registry, and lender-platform workflows.
- Enhanced **ClientConnect**, a client-facing legal intake portal, by developing email notification, secure short-code access, and ID/document workflows across **React** and **Node.js**, reducing client onboarding time by an estimated **70%**.
- TrustShield — placeholder:** Developed features for LDD's legal accounting platform supporting **trust account management, financial transactions, and accounting calculations**. *[Add architecture, technologies, ownership, scale, and measurable impact.]*

Volante Systems

09/2024 - 12/2024

Software Developer Co-op

Toronto, Ontario, Canada

- Developed **10+** new features for Point of Sale (**POS**) system using **React, TypeScript**, and **MobX** across **8** bi-weekly sprints, translating **25+ Figma** design screens into production-ready code with **85% Jest** test coverage.
- Resolved **50+** frontend bugs and optimized **20+** user workflows through close collaboration with **QA** team, achieving **25%** reduction in bug rates and improving checkout flow completion time by **15%**.
- Refactored codebase to resolve internationalization (**i18n**) technical debt by implementing proper localization framework, converting **200+** hardcoded text strings to translation keys and enabling multi-language support.

YITU Technology

05/2022 - 08/2022

Software Developer Intern

Fuzhou, Fujian, China

- Engineered backend services using **Java** and **Spring Boot**, integrating third-party advertising **APIs** with **Redis** caching layer that reduced external **API** calls by **80%** and improved response time by **5x**.
- Designed and implemented **MySQL** database schemas and **RESTful APIs** for enterprise **HR** system serving **8,000+** employees.
- Executed comprehensive testing strategy using **JUnit** for unit tests and **Swagger/Postman** for integration testing, achieving higher code coverage and identifying **30+** critical bugs before production.

EDUCATION

University of Toronto

Toronto, Ontario, Canada

Master of Engineering, Computer Engineering - GPA: 3.97/4.00

09/2023 - 05/2025

- Relevant Coursework:** Cloud-Based Data Analytics; Deep Learning; Cloud Computing; Quality of Service.

McGill University

Montreal, Quebec, Canada

Bachelor of Engineering, Computer Engineering - GPA: 3.80/4.00

09/2019 - 05/2023

- Relevant Coursework:** Algorithms and Data Structures; Distributed Systems; Software Engineering; Software Validation.

ADDITIONAL

Work Authorization: Canadian Citizen(no visa sponsorship required)

Languages: English (Professional Working Proficiency), Mandarin (Native)

Certificates: AWS Certified Cloud Practitioner
