SKILLS

Languages: TypeScript, JavaScript, Java, Python, C/C++

Frontend & Backend: React, Redux Toolkit, MUI, MobX, Node.js, Express, Spring Boot, REST APIs, OIDC/JWT

Data & Cloud: SQL Server, PostgreSQL, MySQL, MongoDB, Redis, Microsoft Azure, AWS, Docker, CI/CD

AI & Automation: Azure AI Document Intelligence, OpenAI API, Browserless.io/BrowserQL, Puppeteer

EXPERIENCE

LawyerDoneDeal Corp.

Full-Stack Software Developer

Nov 2025 - Present

Toronto, ON, Canada

- Built full-stack features for **TrustShield**, a multi-tenant legal trust-accounting SaaS, using **React, TypeScript, Node.js/Express, Sequelize, and PostgreSQL/SQL Server**; rebuilt shared receipt, cheque, and transfer workflows and added client/server balance validation to prevent trust-account overdrafts.
- Developed core modules for a greenfield **Family Law** platform, building financial workflows, automated calculations, reusable auto-saving forms, matter notes, and legal-document generation with **Redux, MUI, and OIDC/JWT**, supporting **hundreds of submissions monthly**.
- Contributed to **RenAI**, an AI-powered legal-document processing system using **Azure AI Document Intelligence** and **vision LLMs** to extract structured data and populate case files, reducing manual entry by an estimated **75% across 5,000+ monthly requests**.
- Shipped full-stack enhancements for **RealtiWeb**, LDD's flagship conveyancing platform used by legal professionals across Canada, supporting property, document, client, and external-registry workflows.
- Took ownership as sole maintainer of **BrowserApi**, an Express/TypeScript automation service for lawyer, realtor, and land-registry integrations; restored a production lookup flow and used **Browserless.io/BrowserQL** to handle evolving **Cloudflare anti-bot challenges**.
- Delivered end-to-end features for **ClientConnect** across the client portal, backend API, firm-side interface, and legacy data layer, including secure short-code access, retainer acknowledgment, consent tracking, document workflows, and transactional email notifications.

Volante Systems

Software Developer Co-op

Sep 2024 - Dec 2024

Toronto, ON, Canada

- Delivered **10+** point-of-sale features from **25+** Figma screens using **React, TypeScript, and MobX** across eight biweekly sprints, maintaining **85% Jest test coverage**.
- Resolved **50+** frontend defects and replaced **200+** hard-coded strings with a reusable localization framework, improving workflow reliability and enabling multilingual releases.

YITU Technology

Software Developer Intern

May 2022 - Aug 2022

Fuzhou, China

- Built **Java/Spring Boot** services integrating third-party advertising APIs with **Redis** caching, reducing external API calls by **80%** and improving response time by **5x**.
- Designed **MySQL** schemas and REST APIs for an enterprise HR system serving **8,000+ employees**, with JUnit and integration testing that identified **30+** critical defects before production.

EDUCATION

University of Toronto

Master of Engineering, Computer Engineering - GPA: 3.97/4.00

Toronto, ON

Sep 2023 - May 2025

McGill University

Bachelor of Engineering, Computer Engineering - GPA: 3.80/4.00

Montreal, QC

Sep 2019 - May 2023

ADDITIONAL

AWS Certified Cloud Practitioner | English and Mandarin | Authorized to work in Canada; no sponsorship required
